Economic Indicators and Monetary Policy

The economic backdrop in the US continues to be one of robust growth and the Federal Reserve remains on track to gradually tighten monetary policy further. Some easing in global trade tensions followed a meeting between President Trump and representatives from the European Union in July and US 10-year Treasury yields have increased back towards the 3% level. Moves above this level could be met by demand from US pension funds.

The employment report released on July 6 showed employers hired 213,000 workers in June, better than expectations for 195,000 jobs added and job gains for May were revised upward to 244,000 from 223,000. The unemployment rate and the underemployment rate each increased 0.2% to 4.0% and 7.8% respectively. The Labor Force Participation Rate increased to 62.9% in June from 62.7% as more workers entered the labor force. Average hourly earnings were unchanged at 2.7% year-over-year in June, less than expectations for 2.8% growth.

The Consumer Price Index (CPI) data released on July 12 increased 0.1% at the headline level and 0.2% excluding food and energy in June. Year-over-year, the CPI was 2.9% including food and energy and the core CPI was 2.3%. On July 11, the Producer Price Index (PPI) data was released. The headline and core readings each increased 0.3% in June and year-over-year the PPI rose 3.4% at the headline level and 2.8% at the core level excluding food and energy.

On July 27, the first estimate of second quarter Gross Domestic Product (GDP) was released showing 4.1% growth, the fastest since 2014. The GDP reading was less than forecasts for 4.2% growth and higher than the first quarter reading of 2.2%. Personal consumption, net exports and business investment contributed to the strong GDP estimate for second quarter activity while decreases in inventories were a drag on the GDP estimate, subtracting 1% from growth. (See Chart 1).

Interest Rate Summary

At the end of July, the 3-month US Treasury bill yielded 2.02%, the 6-month US Treasury bill yielded 2.19%, the 2-year US Treasury note yielded 2.67%, the 5-year US Treasury note yielded 2.85% and the 10-year US Treasury note yielded 2.96%. (See Chart 2).

ADDITIONAL INFORMATION

Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may partly be due to exchange rate changes) and investors may not get back the amount invested. Transactions in foreign securities may be executed and settled in local markets. Performance comparisons will be affected by changes in interest rates. Investment returns fluctuate due to changes in market conditions. Investment involves risk, including the possible loss of principal. No assurance can be given that the performance objectives of a given strategy will be achieved. The information contained herein is for your reference only and is being provided in response to your specific request and has been obtained from sources believed to be reliable; however, no representation is made regarding its accuracy or completeness. This document must not be used for the purpose of an offer or solicitation in any jurisdiction or in any circumstances in which such offer or solicitation is unlawful or otherwise not permitted. This document should not be duplicated, amended, or forwarded to a third party without consent from Insight. This is a marketing document intended for professional clients only and should not be made available to or relied upon by retail clients.

Investment advisory services in North America are provided through two different SEC-registered investment advisers using the brand Insight Investment: Insight North America LLC (INA) and Insight Investment International Limited (IIL). The North American investment advisers are associated with a broader group of global investment managers that also (individually and collectively) use the corporate brand Insight Investment and may be referred to as Insight, Insight Group or Insight Investment.

INA is an investment adviser registered with the Securities and Exchange Commission (SEC), under the Investment Advisers Act of 1940, as amended. Registration with the SEC does not imply a certain level of skill or training. You may request, without charge, additional information about Insight. Moreover, specific information relating to Insights strategies, including investment advisory fees, may be obtained from INA's Form ADV Part 2A, which is available without charge upon request.

Where indicated, performance numbers used in the analysis are gross returns. The performance reflects the reinvestment of all dividends and income. INA charges management fees on all portfolios managed and these fees will reduce the returns on the portfolios. For example, assume that \$30 million is invested in an account with INA, and this account achieves a 5.0% annual return compounded monthly, gross of fees, for a period of five years. At the end of five years that account would have grown to \$38,500,760 before the deduction of management fees. Assuming management fees of 0.25% per year are deducted monthly from the account, the value at the end of the five year period would be \$38,022,447. Actual fees for new accounts are dependent on size and subject to negotiation. INA's investment advisory fees are discussed in Part 2A of its Form ADV.

Unless otherwise stated, the source of information is Insight. Any forecasts or opinions are Insights own at the date of this document (or as otherwise specified) and may change. Material in this publication is for general information only and is not advice, investment advice, or the recommendation of any purchase or sale of any security. Insight makes no implied or expressed recommendations concerning the manner in which an account should or would be handled, as appropriate investment strategies depend upon specific investment guidelines and objectives and should not be construed to be an assurance that any particular security in a strategy will remain in any fund, account, or strategy, or that a previously held security will not be repurchased. It should not be assumed that any of the security transactions or holdings referenced herein have been or will prove to be profitable or that future investment decisions will be profitable or will equal or exceed the past investment performance of the securities listed.

For trading activity the Clearing broker will be reflected. In certain cases the Clearing broker will differ from the Executing broker.

In calculating ratings distributions and weighted average portfolio quality, Insight assigns U.S Treasury and U.S agency securities a quality rating based on the methodology used within the respective benchmark index. When Moodys, S&P and Fitch rate a security, Bank of America and Merrill Lynch indexes assign a simple weighted average statistic while Barclays indexes assign the median statistic. Insight assigns all other securities the lower of Moodys and S&P ratings.

Information about the indices shown here is provided to allow for comparison of the performance of the strategy to that of certain well-known and widely recognized indices. There is no representation that such index is an appropriate benchmark for such comparison. You cannot invest directly in an index and the indices represented do not take into account trading commissions and/or other brokerage or custodial costs. The volatility of the indices may be materially different from that of the strategy. In addition, the strategies holdings may differ substantially from the securities that comprise the indices shown.

The BofA Merrill Lynch 3 Mo US T-Bill index is an unmanaged market index of U.S. Treasury securities maturing in 90 days that assumes reinvestment of all income.
