RE: Carrier 50-EK-024 Replacement

Dear Alex:

Thank you for the opportunity to work with the City of San Pablo Police Department on the replacement of AC-2 a 20-ton Carrier cooling only rooftop unit, serial # 3896F30363. Carrier still makes a direct replacement for this unit. There is an option for the copper finned coils that I have included in this quote. Our proposal includes a new 200-amp service disconnect. As you consider the replacement option please keep this in mind as it does have an impact on the project costs.

The new unit has a 7-week lead time from the factory. This adds 3 weeks to the lead time. There is no option for a quick build

Please accept our proposal to provide the following scope of work:

- Remove and dispose of Carrier 50-EK-024 in accordance with EPA regulations.
- Provide and install new California Title 24 Carrier 50A3-020-LA521VG High Efficiency cooling only rooftop Unit No Heating/20 Tons Cooling 208-3-60
- 4" MERV 7 Pleated Filters
- Variable Capacity Compressor
- Motormaster® V Low Ambient
- Dry-Bulb Changeover Ultra Low Leak Economizer
- Modulating Power Exhaust
- VAV Vertical ComfortLink w/Puron
- No Electric Heat
- Premium Efficiency 05 HP
- Cu / Cu w/ Variable Comp

- New service disconnect and whip to the unit.
- New condensate trap and connection to existing drain
- Start system and confirm proper sequence of operation.
- Rigging
- Provide one-year warranty on all materials, equipment and labor provided by Marina Mechanical. Extended to 2 years if maintained by Marina Mechanical.

Project total \$68,700.00

Exemptions:

Permit. Permit services provided on a cost +15%

Engineering as may be required for permit.

Structural

Work other than described above.

Sincerely,

Ted Hussey
